

TILT SWITCH STAINLESS STEEL FLOAT BALL KIT

FLOAT BALL KIT

RELIABLE. ECONOMICAL. ROBUST.

Leveltec offer a number of accessories to compliment the S2 range of Australian Made Tilt Switches.

The float ball kit is used for application where clients are seeking level detection on fine materials or areas where the likely hood of burying is high.

FEATURES & BENEFITS

- Robust Stainless-Steel construction extends service life
- Quick to Install and Replace via direct 1" BSP thread to Leveltec series two (S2) Tilt Switches
- Increases surface area of the Tilt Switch when used with fine materials to prevent the likelihood of burying
- Kit includes installation instructions and single use locking agent for high vibration areas
- Supplied in individual cardboard cartons for easy store management

APPLICATIONS:

Soft and Fine Materials
